

BULLETPROOF MORCHA

The B.P. Steel Morcha replaces the Sand Bags. Bulletproof Morcha is made from 5 mm~6.5 mm B.P. Steel Plate of 48"x36" Weight App. 50~60 Kg. each Plate as per protection required (SLR or AK-47 Hard Steel Core Bullets) & size of Morcha. For protection from Armor Piercing Bullets the weight per plate will be aprox. 100 Kgs. The Bullet Proof Morcha consists of three plates joined together with hinges. It can be used as picket for Sentry. Specially in the area of insurgency where the terrorist activities are more. It can be erected or dismantled in a very short period.

The Bullet Proof Morcha can be designed & manufactured as per specific requirement. The Firing slot can have B.P. Glass or B.P. Steel Sliding cover. The main advantage of B.P. Morcha is that it can withstand against burst fire & repeated shots on same spot which not possible in sand bags. The sentry can be sent percent protected in clean environment which also requires less space & convenient to use.

The sentry can be sent percent protected in clean environment which also requires less space & convenient to use.
